OPSASSIST AI

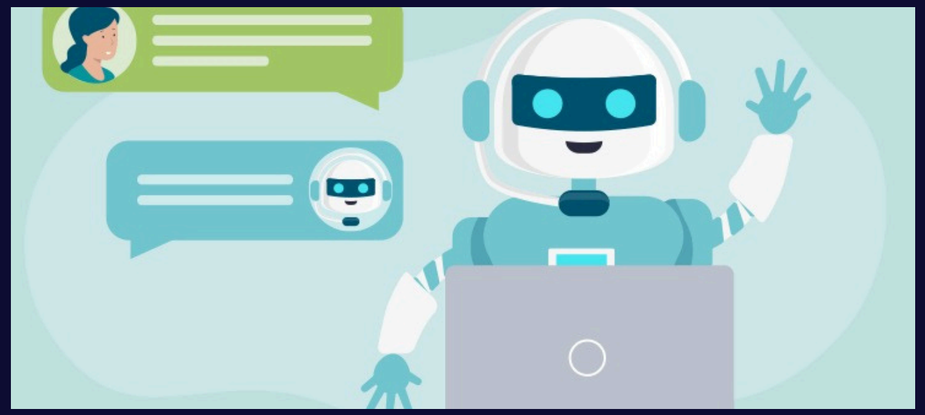

AI-Powered IT Operations & Service Desk Copilot

Intelligent Ticket Analysis • Knowledge Retrieval • Resolution Support

Mankirat Kaur

Junior - Associate IT Ops and Services

The Problem

IT support teams handle a large number of repetitive tickets manually.
This can make ticket analysis, knowledge lookup, troubleshooting, and resolution documentation time-consuming and inconsistent.

Challenges in IT Support

- **Manual Ticket Analysis**

  Tickets often require manual categorization and investigation.

- **Repetitive Troubleshooting**

  Common issues require repeated support steps.

- **Knowledge Lookup**

  Finding the right troubleshooting information can take time.

- **Inconsistent Documentation**

  ServiceNow work notes may vary in structure and detail.

Project Objectives

OpsAssist AI aims to use Artificial Intelligence to assist IT support teams in handling service desk tickets faster and more efficiently.

Key objectives:

- Automate IT ticket classification
- Retrieve relevant knowledge using RAG
- Generate structured ServiceNow work notes
- Recommend appropriate resolutions
- Provide an interactive IT support assistant
- Benchmark local LLMs for performance

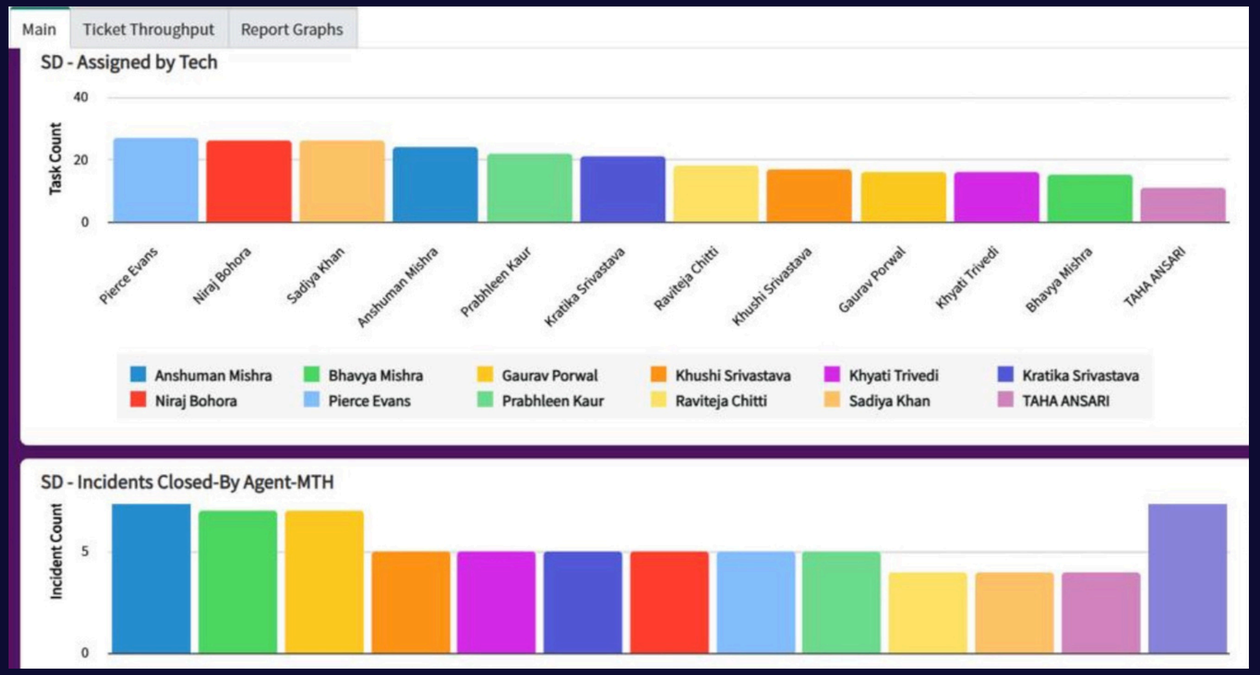

PROPOSED SOLUTION

01 AI-Powered Ticket Analysis

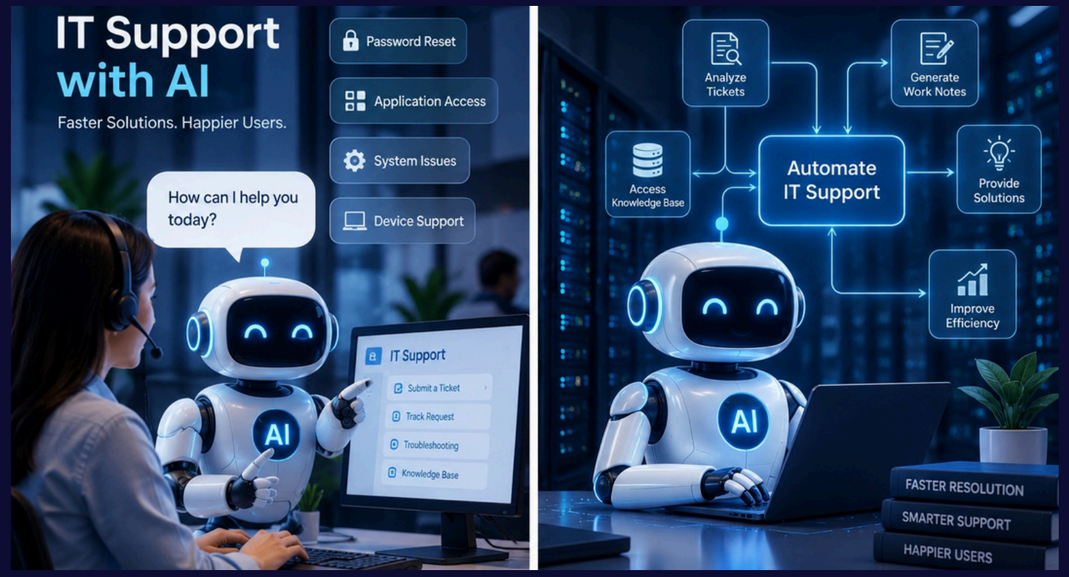

OpsAssist AI automatically analyzes IT support tickets and classifies them into relevant categories using Machine Learning.

02 Knowledge-Guided Resolution

A RAG-based knowledge retrieval system finds relevant IT troubleshooting information and provides context-aware resolution guidance.

Our Vision

01 Intelligent IT Support

To simplify IT support by using AI to understand user issues, provide relevant troubleshooting guidance, and reduce repetitive manual work.

02 Faster & Smarter Resolution

To help support teams resolve incidents faster through automated ticket analysis, ServiceNow work notes, RAG-based assistance, and AI-powered recommendations.

Our Mission

01

Simplify IT Support

Use AI to understand common IT issues and provide quick, relevant solutions to users.

02

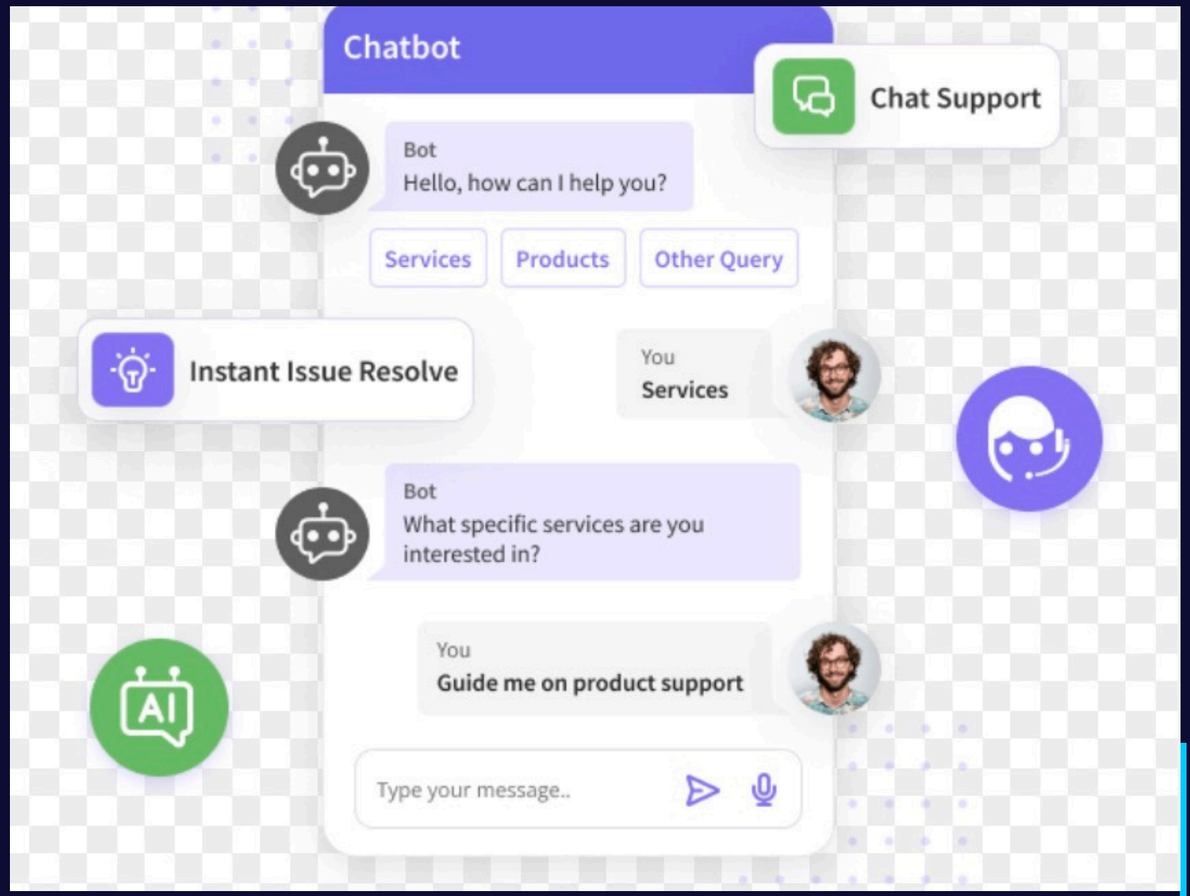

Automate Repetitive Tasks

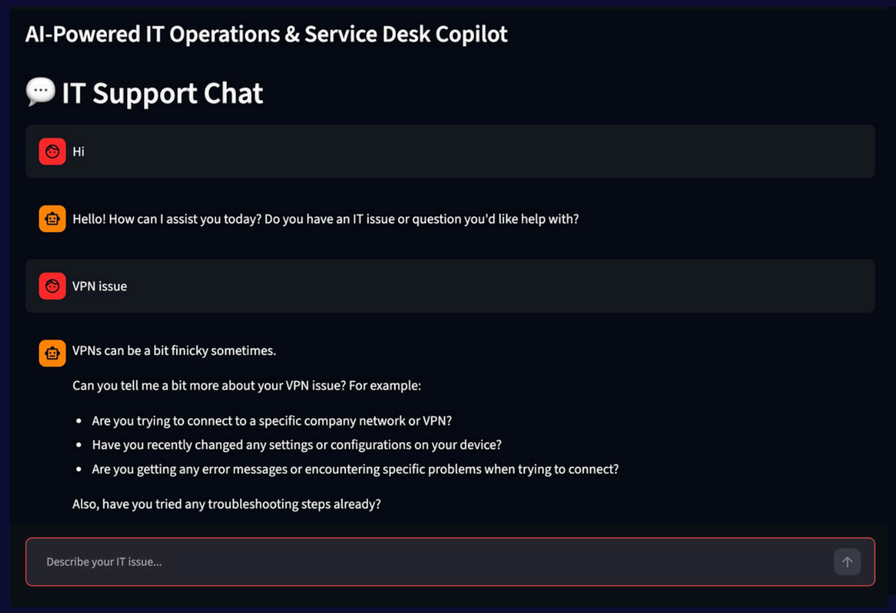

Reduce manual effort in ticket analysis, troubleshooting, and work-note generation.

03

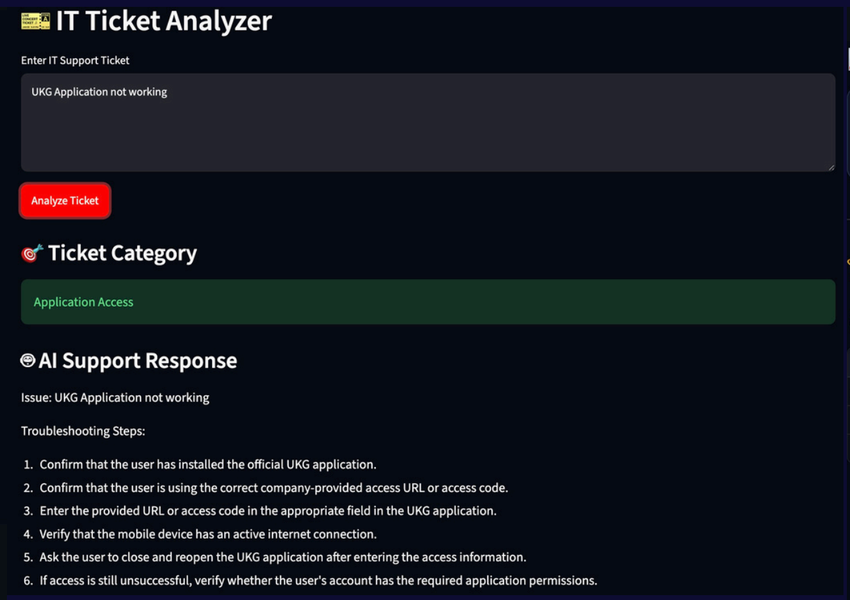

Empower Support Teams

Combine AI, knowledge retrieval, and ticket insights to help support teams resolve issues more efficiently.

Our Portfolio

AI-Powered Ticket Intelligence

OpsAssist AI analyzes IT support tickets, automatically identifies the issue category, and generates an appropriate support response. It also creates ServiceNow-ready work notes and resolution recommendations to reduce manual effort.

Smarter Support with AI

The platform provides an interactive IT support chatbot and benchmarks local AI models based on quality, speed, memory usage, and overall performance to select the most suitable model for operational use.

THANK YOU

Let’s Make IT Operations Smarter.
